

Allied Tajar Software Company Documentation

Introduction

Allied Tajar is a modern ERP (Enterprise Resource Planning) solutions provider that specializes in transforming supply chains for manufacturers, distributors, wholesalers, aviation companies, real estate businesses, and CRM-based operations. The company partners with hundreds of organizations, including Fortune 500 companies and mid-sized firms, to streamline processes, improve productivity, and ensure long-term growth.

Our Vision

To empower businesses with advanced ERP technology that simplifies operations, enhances efficiency, and drives sustainable growth across industries in Pakistan, Oman, Qatar, UAE, and Saudi Arabia.

Key Solutions

1. All-in-One ERP Dashboard

Description:

A central platform where businesses can monitor sales, clients, reports, and daily operations.

Benefits:

- Improves productivity by saving time
 - Provides quick insights for decision-making
 - Allows management to track performance in real-time
-

2. Data Protection

Description:

Ensures that sensitive business data is always safe and secure.

Features & Benefits:

- Advanced data encryption for maximum security
 - Automated and secure backups
 - Strict role-based access controls for privacy
 - Builds customer trust with reliable security standards
-

3. Real-Time Booking & Orders

Description:

Businesses can monitor and process client orders, bookings, and payments instantly.

Benefits:

- Faster response to customer needs
 - Improved cash flow management
 - Reduced delays and errors in order handling
-

4. Automated Reporting

Description:

The ERP generates daily, weekly, and monthly reports automatically with one click.

Benefits:

- Saves time and effort in report preparation
 - Provides accurate and consistent data
 - Helps managers and stakeholders make better business decisions
-

5. Secure Data Storage

Description:

Business data is stored with end-to-end encryption and backed up on secure cloud servers.

Benefits:

- Protects against data loss and cyber threats
 - Ensures continuity of operations even in emergencies
-

6. Role-Based Access

Description:

Allows assigning permissions based on user roles within the company.

Benefits:

- Protects sensitive data from unauthorized access
 - Improves internal security and accountability
 - Customizable according to company hierarchy
-
